The National Congress of American Indians Policy Research Center (NCAI PRC), in partnership with the Center for Diabetes Translation Research at Washington University in St. Louis, will host two sessions on diabetes translation research at the Association of American Indian Physicians (AAIP) Annual Meeting & Health Conference at the Grand Casino Hotel & Resort in Shawnee, OK.

**The Nuts & Bolts of Diabetes Translation Research**
Pre-Conference Breakout Session | 2:00 - 5:00 pm  July 26th, 2017
What is it, why does it matter, and how can diabetes translation research inform medical practice in tribal contexts? Join us as we share resources and examples from our partnership with the Center for Diabetes Translation Research at Washington University in St. Louis.

**A Call for Diabetes Comorbidities Research to Practice Connections**
Concurrent Breakout Session | 3:00 – 4:00 pm  July 27th, 2017
What lies at the nexus of behavioral and physical health conditions that are concurrent or comorbid with diabetes? Join us to discuss priorities for diabetes comorbidities research to inform medical practice, identify challenges for providing diabetes care for AI/AN patients, and share resources to support research to practice connections to improve outcomes.

Visit [www.aaip.org](http://www.aaip.org) for the full conference agenda and registration details, and don’t forget to stop by our table in the Exhibit Hall for resources on diabetes translation research and more!

The CDTR is supported by NIH-NIDDK grant P30DK092950
