

## **Building Sustainable Tribal Economies: Components of Strategic Design**

*Tuesday, October 23, 2018*

*1:30 p.m. – 4:00 p.m.*

*Denver, Colorado*

This session will train the focus of tribal leaders and key decision-makers on foundational components necessary to strategically build an integrated, sustainable, *tribal* economy: purpose, values, place, environment, institutions, capacity, resources, integration, and growth. Centered on the task of “seeding economic prosperity,” it will explore critical questions that tribal leaders and key decision-makers must ask of themselves, their governments, tribal employees, tribal citizens, and their current tribal economic development efforts in order to craft economy-building approaches capable of achieving their long-term, nation-building goals.

### **AGENDA:**
