David Beurle
Future iQ Partners, Inc. |
| 4:00 - 4:30 pm | Debrief & Conclusion |

DESCRIPTION:

Tribal Data Capacity & Research Futures – Governance, Culture, and Trust

In an age where information is power, tribal nations are increasingly building research capacity and using data to guide policymaking. In this session, we will preview the contents of two upcoming reports from the NCAI Policy Research Center – one on aspects of tribal data capacity, and the other on tribal research partnerships. The remainder of the breakout session will be dedicated to the launch of the *Tribal Research Futures Game*. Attendees will have a chance to play the game, which illuminates tensions that can arise in partnerships dealing with research and data resources, design, dissemination, and implementation.

PRESENTERS:

Yvette Roubideaux, MD, MPH
Director, NCAI Policy Research Center
yroubideaux@ncai.org

Amber Ebarb, MPP
Budget & Policy Analyst, NCAI Policy Research Center
aebarb@ncai.org
