

**CONNECTICUT STATE POLICE AND**  
**MASHANTUCKET PEQUOT GAMING ENTERPRISE**  
**VIDEO/AUDIO TAPE EVIDENCE PROTOCOL**

The purpose of this protocol is to define a process for securing and transferring video or audio<sup>1</sup> tapes or other media<sup>2</sup> to be used in investigations conducted by the Connecticut State Police or in a criminal prosecution in a court of competent jurisdiction. The media referenced herein are maintained by employees of the Mashantucket Pequot Gaming Enterprise Security Department or the Mashantucket Pequot Tribal Surveillance Department at the Mashantucket Pequot Gaming Enterprise property (hereinafter collectively "MPGE"). The MPGE Surveillance and Security operations are conducted pursuant to the Final Mashantucket Gaming Procedures, 56 Fed. Reg. 24996, May 31, 1991, and regulated by both the Mashantucket Pequot Gaming Commission and the National Indian Gaming Commission pursuant to Minimum Internal Control Standards, 25 C.F.R. Part 542.

When MPGE captures an image or language on video or audio tape or other media and such image or language relates to an investigation or criminal prosecution in which the Connecticut State Police and the Mashantucket Pequot Tribe have a mutual interest, the following protocol will be utilized to secure such and transfer such media.

1. As soon as practicable, a State Trooper will review the media with MPGE.
2. If it is determined by the State Trooper that the media contains information that is pertinent to the investigation or prosecution, MPGE will immediately take the original media out of service.
3. The State Trooper will submit a written request delineating specific reasons for the media, via a State Police request form (Attachment A), for a copy of the original media and that the original media be retained by MPGE as evidence.

---

<sup>1</sup> Tapes of audio recordings are used in limited circumstances, for example in the soft count rooms and the bingo facilities.

<sup>2</sup> With modern technology, video and audio tapes may be replaced by compact or digital discs. Accordingly the word "media" will be used to refer to any form or format of technology used to capture or replicate the image or language.

4. As soon as possible thereafter, MPGE will produce a VHS copy or other agreed media and release the media to a State Trooper as soon as possible, who shall acknowledge the receipt of the copy by signing an MPGE acknowledgement letter (Attachment B).

The MPGE custodian of the media will sign a Certificate of Authenticity (Attachment C) certifying that the copy is a true and accurate copy of the original media.

5. MPGE will secure and retain the original media as evidence as follows:

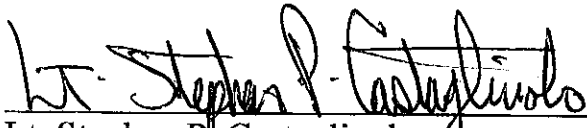

a. The original media will be stored in a secure and locked location ("Storage") so as to maintain control of the media and ensure that there is no handling/tampering/altering of the original media;

b. The original media shall be recorded in a log book documenting the following:

- (1) Date and time media was placed INTO Storage;
- (2) Person who placed media into Storage;
- (3) Any person(s) who has had access to Storage (Date/Time/Reason);
- (4) Date, time and reason media was logged OUT of Storage;
- (5) Person who took media from Storage; and
- (6) When requested by the prosecuting attorney of the court of jurisdiction, MPGE will provide the original media to the said court via the State Police, in aid of prosecution of the case under investigation.

6. Upon completion of the investigation or prosecution, the original and copy of the media shall be returned to the MPGE.

This protocol is agreed to by both the Connecticut State Police and Mashantucket Pequot Tribe and the Mashantucket Pequot Gaming Enterprise by the signature of their undersigned representatives.

Lt. Stephen P. Castagliuolo  
Commanding Officer, Casino Unit  
Connecticut State Police
