Age Distribution

In Alabama, the median age for the AIAN alone population was 35.3 years compared to 40.9 for the White population.

The median age for the AIAN alone or in combination population was 36.5.
- In Florida, the median age for the AIAN alone population was 35.1 years compared to 44.5 for the White population.
- The median age for the AIAN alone or in combination population was 34.5.
- The median for AIAN alone or in combination people on reservation land in Florida was 23.1.

- In Florida, the median age for the AIAN alone population was 31.6 years compared to 39.6 for the White population.
- The median age for the AIAN alone or in combination population was 31.2.
- The median for AIAN alone or in combination people on State Designated Tribal Statistical Areas was 27.
In Mississippi, the median age for the AIAN alone population was 28.6 years compared to 40.4 for the White population.
- The median age for the AIAN alone or in combination population was 30.7.
- The median for AIAN alone or in combination people on federal reservation land was 23.

In North Carolina, the median age for the AIAN alone population was 32.7 years compared to 40.6 for the White population.
- The median age for the AIAN alone or in combination population was 31.2.
- The median for AIAN alone or in combination people on State Designated Tribal Statistical Areas was 31.6.
- In South Carolina, the median age for the AIAN alone population was 33.9 years compared to 41.1 for the White population.
- The median age for the AIAN alone or in combination population was 32.5.

- In Virginia, the median age for the AIAN alone population was 34.1 years compared to 40.3 for the White population.
- The median age for the AIAN alone or in combination population was 31.7.
Educational Attainment

The figure below shows the percentage of AIAN and White populations over 25 with a high school diploma or higher and percentage with a bachelor’s degree or higher.

![Graph showing educational attainment](image)

Florida had the highest percentage of the AIAN population over 25 attaining a bachelor’s degree, at 20 percent, and Virginia had the second highest at 19 percent. The AIAN population over 25 in Mississippi had the lowest bachelor’s degree attainment at 9 percent, less than half the proportion of the White population.

The following figures show highest level of education for AIAN and total populations over age 25 in for each state.

The Dropout Rate is the count of grade dropouts by race divided by the enrollment base for the grades. These data are from the CCD State-Level Dropout file.

Averaged Freshman Graduation Rate (AFGR) of students is an estimate of the percentage of an entering freshman class students graduating in 4 years. These data are taken from the CCD State Dropout and Completion Data File.
Housing Characteristics

The figure below shows percentage of AIAN and White occupied housing units in Connecticut, Maine, Massachusetts, New Jersey, and New York which have no telephone service available.

**No telephone service available**

Occupyants per Room is obtained by dividing the number of people in each occupied housing unit by the number of rooms in the unit. The figures show the number of occupied housing units having the specified ratio of people per room. Although the Census Bureau has no official definition of crowded units, many users consider units with more than one occupant per room to be crowded.

**Occupants per Room**

# means median reliability; ! means low reliability
