

Education

Access to quality education is even more important in today's challenging economic climate. It is an essential strategy for creating jobs and securing the nation's future prosperity – particularly in tribal communities. An educated citizenry serves as a catalyst to boost tribal economic productivity and growth through a more highly-skilled competitive workforce, which can attract new businesses, reduce rampant unemployment, stimulate reservation economies through direct spending, and foster a greater entrepreneurial spirit for all tribal citizens to become more self-sufficient. Education provides personal progression and wellness, which in turn increases social welfare and energizes tribal communities that are essential to protecting and advancing tribal sovereignty.

To give tribal nations the necessary foundation for economic success and prosperity, the federal government must live up to its trust responsibility by providing adequate support for Native education. The requests below detail the minimum funding needed to sustain a system that is currently struggling and underfunded. NCAI has provided these FY 2020 Budget requests to illustrate the budgetary need for effectively serving Native students and strengthening tribal self-determination in education.

DEPARTMENT OF EDUCATION

Labor, HHS, and Education Appropriations Bill

Title I, Part A of the Every Student Succeeds Act Local Education Agency Grants

- *Provide \$20 billion for Title I, Part A.*

Title I of the Every Student Succeeds Act (ESSA) provides critical financial assistance to local educational agencies (LEAs) and schools with high percentages of children from low-income families that ensure all children meet challenging state academic standards. Currently, there are over 600,000 Native students across the country with nearly 93 percent of those students attending non-federal institutions, such as traditional public schools in rural and urban locations. A drastic increase in funding to counter annual inflation and sequestration, as well as to match the amount appropriated under the American Reinvestment and Recovery Act (ARRA), is necessary to meet the needs of Native students and students from low-income families.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Section 6131 of Every Student Succeeds Act

- *Provide \$5 million for the State-Tribal Education Partnership Program.*

Provide \$5 million for the State-Tribal Education Partnership Program (STEP). Native education researchers, experts, and advocates have long been calling for Native control of Native education. The STEP program is Congress's recognition of the call for tribal leadership in education. In 2016 and 2017, Congress appropriated roughly \$2 million for the STEP program to five participating tribes under the Tribal Education Department appropriations. For Native control of Native education to continue to succeed, the program should be funded at \$5 million in FY 2020. Collaboration between tribal education agencies and local and state educational agencies is crucial to develop the tribal capacity to assume the roles, responsibilities, and accountability of Native education departments and to increase tribal self-governance over Native education. Under ESSA state, tribal, and local controls are the clear trend. Funding STEP is a critical extension of the principle of local self-governance and sovereignty.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Impact Aid

- *Provide \$2 billion for Impact Aid, Title VII funding under the Every Student Succeeds Act.*

Impact Aid provides direct payments to public school districts as reimbursement for the loss of traditional property taxes due to a federal presence or activity, including the existence of an Indian reservation. With nearly 93 percent of Native students enrolled in public schools, Impact Aid provides essential funding for schools serving Native students. Funding for Impact Aid must not be less than this requested amount. Furthermore, Impact Aid should be converted to a forward-funded program to eliminate the need for cost transfers and other funding issues at a later date.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Title VI, Part A, of the Every Student Succeeds Act

- *Provide \$198 million for Title VI, Part A, Indian Education Formula Grants.*

Increases are needed for Indian Education Formula Grants as this critical grant funding is designed to supplement the regular school program and assist Native students so they have the opportunity to achieve the same educational standards and attain parity with their non-Native peers. Title VI funds support early-childhood and family programs, academic enrichment programs, curriculum development, professional development, and culturally-related activities. As Native students lag far behind their non-Native peers in educational achievement, increased funding is necessary to address this substantial gap.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Title VI, Part C of the Every Student Succeeds Act

- *Provide \$40 million for Alaska Native Education Equity Assistance Program.*

Alaska does not receive any BIE funding, making this source of funding the only resource available for Alaska Native tribes and organizations to provide supplemental programs that address the achievement gap for Alaska Native students. Increases are needed as this assistance program funds the development of curricula and education programs that address the unique educational needs of Alaska Native students, as well as the development and operation of student enrichment programs in science and mathematics. This funding is crucial to closing the gap between Alaska Native students and their non-Native peers,

as eligible activities include professional development for educators, activities carried out through Even Start Programs and Head Start programs, family literacy services, and dropout prevention programs.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Title VI, Part B of the Every Student Succeeds Act

- *Provide \$40 million for Native Hawaiian Education Program.*

This grant program funds the development of curricula and education programs that address the unique needs of Native Hawaiian students to help bring equity to this Native population. The Native Hawaiian Education Program empowers innovative culturally appropriate programs to enhance the quality of education for Native Hawaiians. These programs strengthen the Native Hawaiian culture and improve educational attainment, both of which are correlated with positive economic outcomes.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Title VI, Part A, Subpart 3 of the Every Student Succeeds Act

- *Provide \$5 million for Language Immersion Grants.*

Provide \$5 million for Native American and Alaska Native Language Immersion Schools and Programs, as first time funding for this critical program authorized in the Every Student Succeeds Act through a 20 percent set aside through National Activities. The Every Student Succeeds Act promotes co-existence of Immersion Schools through Section 6133, which recognizes the unique educational and culturally related academic needs of Native children. Section 6133 includes Native languages as the medium of instruction where tribal communities have the capacity and desire to engage in immersion instruction. Providing \$5 million to this program—outside the 20 percent set aside—is both critical to furthering the federal government’s commitment to improving the educational outcomes of American Indian and Alaska Native students. Congress recognized this critical role by including authorization for immersion schools for the first time. Extensive research over decades, along with strong support from tribal leaders and Native advocates across the country make providing \$5 million for this program, above and beyond the 20 percent set aside, a high priority.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill Title VI, Part A, Subpart 2, of Every Student Succeeds Act

- *Provide \$67.9 million for Special Programs for Native Students.*

In Title VI of the Every Student Succeeds Act, Congress continued demonstration grant funding and professional development funding to meet the needs of Native students and newly authorized funding to serve Native youth through grants for culturally appropriate education—Native Youth Community Projects. This program addresses the critical issues of teacher shortages, evidence-based work at the state and local level, and locally driven strategies to empower Native youth. The professional development grants are essential ways of improving teaching in rural communities and are consistent with the Every Student Succeeds Act’s movement toward state-driven work. The Native Youth Community Projects are critical in helping Native communities at the local level via small, competitive grants that seek to engage youth in high-need areas.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill

Tribal Colleges and Universities: Supporting Financially Disadvantaged Students

- *Provide \$65 million for Title III-A grants under the Higher Education Act for Tribal Colleges and Universities.*

\$65M is needed for the Tribal Colleges and Universities (TCUs) Title III, Part A (discretionary) program in FY2020, due to the expiration of the Part F mandatory funding. The Part F program—which makes up more than half of the TCU Title III program—is slated to end after FY2019 if Congress does not authorize and appropriate new funding. Failure to reauthorize the Part F program will be devastating to all TCUs. Despite serious resource challenges, TCUs provide high quality, culturally appropriate higher education opportunities to some of the most rural, isolated, impoverished, and historically underserved areas of the country. The goal of HEA Title III programs is “to improve the academic quality, institutional management and fiscal stability of eligible institutions, in order to increase their self-sufficiency and strengthen their capacity to make a substantial contribution to the higher education resources of the Nation.” The TCUs are employing these funds to address the critical, unmet needs of their students who are primarily American Indian/Alaska Native to effectively prepare them to succeed in a globally competitive workforce.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill

Tribal Colleges and Universities: Adult/Basic Education

- *Provide \$8 million for American Indian Adult/Basic Education at Tribal Colleges and Universities, from existing funds appropriated for state block grant funding.*

Despite an absence of dedicated funding, TCUs must find ways to continue to provide basic adult education classes for those Native students that the present K-12 Indian education system has failed. At TCUs, the number of students in need of remedial education before embarking on their degree programs is substantial. There is a wide-ranging need for basic adult education and literacy programs, and TCUs need adequate funding to support the ever-increasing demand for basic adult education and remediation program services.

DEPARTMENT OF EDUCATION

Labor, HHS, Education Appropriations Bill

Tribally Controlled Post-Secondary Career and Technical Institutions

- *Provide \$10 million for tribally controlled postsecondary career and technical institutions program funds under the Carl Perkins Career and Technical Education Improvement Act.*

Section 117 of the Carl Perkins Career and Technical Education Improvement Act authorizes funding for operations at tribally controlled postsecondary career and technical institutions. Vocational education/training programs are vital to preparing a future workforce that will operate safely and efficiently contributing greatly to the global economy.

DEPARTMENT OF EDUCATION

Labor, HHS, and Education Appropriations Bill

Native American-Serving, non-Tribal Institutions (Higher Education Act Title III-F)

- *Provide \$10 million for non-tribal, Native-serving institutions of higher education.*

As the primary federal funding for non-tribal, Native-serving institutions of higher education, the current funding levels are insufficient. With nearly 100 institutions potentially qualifying as Native-serving, non-tribal institutions, this strains the small

amount of available funding. Increasing the funding will provide the opportunity for more Native-serving institutions to better serve their students and increase graduation rates among Native students.

SHARED RESPONSIBILITY:

DEPARTMENT OF EDUCATION AND DEPARTMENT OF THE INTERIOR

Labor, HHS, Education Appropriations Bill, and Interior - Environment Appropriations Bill Tribal Education Agencies/Departments

- *Provide \$20 million (\$10 million through the Department of Education and \$10 million through the Department of the Interior) to fund Tribal Education Agencies.*

Ten million dollars should be appropriated to the Department of Education, and \$10 million should be appropriated to the Department of the Interior to support tribal education agencies (TEAs). This funding assists TEAs, which are uniquely situated at the local level to implement innovative education programs that improve Native education. Because they are administered by tribes, TEAs are best equipped to deliver education programs tailored to improve education parity for Native students. TEAs would use this much-needed funding to develop academic standards, assess student progress, and create math and science programs that require high academic standards for students in tribal, public, and Bureau of Indian Education schools. Tribes utilizing self-governance over education have been very successful because they better understand the circumstances of their populations and can develop initiatives that meet local needs.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill School Construction and Repair

- *Provide \$430 million for system-wide Bureau of Indian Education (BIE) school construction and repair.*

This funding category includes school construction, facilities improvement and repair, and replacement school construction. Schools operating within the BIE system are woefully outdated and, in some cases, dangerous for students and staff. Currently more than 60 BIE schools are rated in “poor” condition, which puts Native students at an unfair disadvantage. The Department of the Interior’s Office of Inspector General published in September of 2016, an evaluation titled “Condition of Indian School Facilities,” that estimated the cost of fixing the dilapidated BIE schools. It concluded that more than \$430 million would be needed to fix the problems already identified.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Johnson O’Malley

- *Provide \$42 million for full funding.*

The Johnson O’Malley (JOM) program has provided grants to supplement basic student needs since 1934. It is currently being used across the country in innovative ways to assist with the unique cultural and scholastic needs of Native students. The federal government allocated \$96 per student in JOM funding in 1995. However, that investment has steadily declined, and current funding provides less than \$46 per student. This funding is oftentimes the only source through which Native students – including those in public schools – can engage in basic education activities. Additional funds are needed to begin to address needed increases in per student allocation for the future.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Student Transportation

- *Provide \$73 million for student transportation in the BIE system.*

BIE schools incur significant costs in transporting Native students to and from school. These costs are considerably higher than most school systems due to the often rural location of BIE facilities. Additionally, the poor road conditions that students, staff, and families must use to access BIE-funded schools increase vehicle maintenance costs. These high costs often lead to funding shortfalls, which then must either go unpaid or be funded by diverting funds from other education programs.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Tribal Grant Support Costs

- *Provide \$90 million for tribal grant support costs for tribally controlled schools.*

Tribal Grant Support Costs fund the administrative costs of existing tribally-operated schools. It is critical that tribal governments are funded at the same level as the federal government when they exercise self-governance and tribal control over education programs by allocating monies for administrative costs such as accounting, payroll, and other legal requirements. Schools must divert critical teaching and learning funding to cover any shortfalls in operational costs. Fully funding Tribal Grant Support Costs is the key to supporting true tribal self-determination in education.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Facilities Operations

- *Provide \$109 million for BIE facilities operations.*

BIE schools use this funding for costs such as electricity, heating fuels, communications, vehicle rentals from the General Services Administration, custodial services, and other operating expenses. For years, schools have only received roughly 50 percent of funding needed for these expenses. This shortfall is unacceptable as costs continue to rise for vital services.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Facilities Maintenance

- *Provide \$76 million for BIE facilities maintenance.*

BIE schools use this funding for both preventative and routine upkeep, as well as for unscheduled maintenance of school buildings, grounds, and utility systems. Underfunding of maintenance continues to be an issue as buildings are in poor conditions and cannot maintain proper standards.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Indian School Equalization Program (ISEP)

- *Provide \$431 million for the Indian School Equalization Formula.*

These funds provide the core budget account for BIE elementary and secondary schools by covering salaries for teachers, aides,

principals, and other personnel. Indian School Equalization Program (ISEP) funds are often reallocated to cover the program cuts in other areas of education. ISEP must have adequate funding to ensure all program needs are fulfilled and must not be reduced to provide funds for new initiatives that have not been vetted by tribes.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill

Education Management: Education IT

- *Provide \$40 million for Education IT.*

According to the Federal Communications Commission's 2016 Broadband Progress Report, 63 percent of tribal lands across the country lack access to high-speed broadband services. In 2018, the GAO issued a report indicating that the 63 percent number is understated and that the lack of access is actually larger. This lack of access has a significant impact in BIE-funded schools. NCAI seeks adequate funding to ensure that BIE-funded schools have broadband access as well as the computers and software necessary to administer online assessments, and that school staff receive appropriate resources and training. In future fiscal years ongoing funding will be needed to maintain and update this investment in Education IT infrastructure. The federal government must commit to sustained funding and broadband access to ensure that BIE-funded schools can meet the needs of a modern learning environment.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill

Bureau of Indian Education (BIE) Immersion Demonstration Grants

- *Provide \$5 million for BIE immersion programs.*

According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), 74 Native languages stand to disappear in the next decade, with only 20 Native languages being spoken by 2050. Funding under the BIE reform efforts should strengthen tribal sovereignty to increase capacity to support Native language immersion schools and provide Native students equal access to learning their culture and languages. Providing Immersion Demonstration Grant funds would protect the cultural and linguistic heritage of Native students in education systems by providing Native students immersion learning in order to strengthen their language, improve academic outcomes, and become future leaders of their tribe.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill

Juvenile Detention Education

- *Reinstate \$620,000 for juvenile detention education in BIA-funded facilities.*

These critical funds were reinstated in FY 2016 at \$500,000, reflecting the bipartisan support for funding to address juvenile justice issues. Funding the program at \$620,000 is essential funding that will be used to provide educational services to detained and incarcerated youth at 24 BIA-funded juvenile detention facilities. One of the best methods to rehabilitate individuals is through education, and eliminating this program creates additional costs by increasing the rate of criminal recidivism.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Tribal Colleges and Universities' (TCUs) Institutional Operations

- *Provide \$81.69 million for Titles I, II, and III and the technical assistance contract under the Tribally Controlled Colleges and Universities Assistance Act.*

Title I: To fully fund Title I of the Tribally Controlled Colleges and Universities Assistance Act of 1978 (Tribal College Act), which provides day-to-day operating funds for 38 TCUs, would require \$81.69 million. The education of Native students is a trust responsibility. For many Native students, TCUs are their primary means of receiving a higher education. Accordingly, since the Act was first funded in 1981, the number of TCUs has more than quadrupled and enrollments have increased by more than 325 percent. But despite this increase in student population, TCUs have never received the authorized level of operational funding of \$8,000 per student and are currently receiving \$7,285 per Indian student. With the possible return of sequestration, this already underfunded but indispensable program faces significant cuts. The more than 35-year federal investment in this proven program will be lost, as some of these institutions may be forced to close their doors. Congress has an obligation to invest in these critical institutions.

Title II: Diné College has a need for \$17 million to operate its campuses on the Navajo Nation in Arizona and New Mexico.

Title III/Technical Assistance: \$701,000 is needed to level fund critical technical assistance (which has not been increased since FY 2006) and to assist TCUs in establishing endowments. Title V/ Tribally Controlled Career and Technical Institutions: \$10 million for institutional operations costs for two tribally-controlled career and technical institutions.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Institute of American Indian Arts and Center for Lifelong Education & Museum (AIANNH Culture and Art Development Act)

- *Provide \$10.21 million for Institute of American Indian Arts and Center for Lifelong Education.*

Institute of American Indian Culture and Arts (IAIA) is a federally chartered, accredited, non-profit educational institution, whose mission is to serve as a multi-tribal center of higher education for Native Americans.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill Haskell Indian Nations University & Southwest Indian Polytechnic Institute (Snyder Act)

- *Provide \$25 million for Haskell Indian Nations University and Southwest Indian Polytechnic Institute.*

The Bureau of Indian Education, Department of the Interior, operates two tribal postsecondary institutions, namely Haskell Indian Nations University (Haskell) located in Lawrence, Kansas, and Southwestern Indian Polytechnic Institute (SIPI) located in Albuquerque, New Mexico. These accredited institutions of higher education are critical in providing educational and professional opportunities for Indian students.

DEPARTMENT OF THE INTERIOR

Interior - Environment Appropriations Bill

Haskell Indian Nations University & Southwest Indian Polytechnic Institute (Snyder Act)

- *Provide \$31 million for TCU Infrastructure Improvement (25 USC 1813)*

We urge Congress to fund section 113 of the TCCUA Act and establish a new infrastructure development program for Tribal Colleges. A key part of the mission of TCUs is to prepare AI/ANs, and other rural community members to be self-sufficient members of the nation's workforce. For TCUs to realize this goal, they must have the facilities necessary to educate and train students for 21st century jobs. A recent TCU needs assessment revealed a need of \$120 million to address current TCU shovel-ready projects and facilities rehabilitation.

DEPARTMENT OF AGRICULTURE

Agriculture Appropriations Bill

National Institute for Food and Agriculture

1994 Land-Grant Institutions (TCUs)

In 1994, Tribal Colleges and Universities (TCUs) achieved federal land-grant status through the passage of the Equity in Educational Land-Grant Status Act. However, the 34 TCU land-grant institutions are still not recognized or funded as full partners in the nation's land-grant system. Serious inequities exist and as a result, their potential remains unrealized. With anticipated reductions in tribal funding, American Indian and Alaska Native students will inevitably have fewer sources for financial aid. Thus, basic levels of mandated funding to TCUs become that much more important to enable Native people to pursue higher education. Funding for extension programs at the 34 institutions is just 1.5 percent of that appropriated for the 1862 (state) land-grants and 10 percent of that appropriated for the 1890 (18 HBCUs) land grants. In the area of research, the 1994s receive less than 1 percent of that appropriated for the 1862s and just 3.4 percent appropriated for the 1890s. Appropriations at the requested levels outlined below for each of the 1994 land-grant institution programs, as part of a five-year funding plan, is a small but critical step in addressing disparities that exist in the current land-grant system.

1994 Extension Program

- Provide \$9 million for the 1994 Extension Grants Program.

The 1994 Extension Program is designed to complement, not duplicate, the Federally-Recognized Tribe Extension Program (FRTEP). Ironically, the 1994 Institutions, which are chartered by federally recognized Indian tribes, were the only members of the land-grant system that were prohibited from competing for these grant dollars that are focused on serving federally recognized tribes. The 1994 Extension Program activities include: outreach to at-risk youth; business skills development for local agriculture entrepreneurs; Native plant restoration and horticulture projects; environmental analysis and water quality projects; and nutrition projects aimed at addressing health disparities, such as high rates of diabetes among Native populations. Congress must adequately invest in the 1994 extension programs serving reservation communities.

1994 Research Grants

- Provide \$5.8 million for the 1994 Research Grants Program.

The 1994 Research Grants Program allows TCUs to partner with other land-grant institutions in research areas such as agriculture marketing, renewable energy, nutrition and health, Native plants and horticulture, water quality, and land management. These research areas are of increasing importance as tribal economic development and other tribal efforts to address pressing challenges depend on access to quality data and evidence. These challenges include the disproportionate impacts of environmental fluctuation on tribal lands and people, as well as the impact of poor economic conditions. TCUs need and deserve a level of funding that will increase their capacity for further developing and conducting research and for strengthening education and sustainable economic development important to their tribal communities.

1994 Educational Equity Grant Program

- Provide \$4 million in Educational Equity Grant Program funding for the 1994 land-grant institutions.

The Education Equity Grant Program assists TCU land-grant institutions to establish academic programs within the field of agriculture that explore areas such as natural resource management, nutrition, environmental science, horticulture, sustainable development, and forestry. The funding requested will help in preparing to address issues of climate change and its impact on agriculture, ecosystems, and natural resources focusing on remote reservation communities. Additionally, this investment will support TCU efforts to provide increased nutrition education to their reservation communities, which experience diabetes and other health issues at rates far greater than the national average.

1994 Native American Institutions Endowment Fund (Corpus Payment)

- Provide an additional \$15 million payment into the corpus of the 1994 Native American Institutions Endowment Fund.

The Native American Institutions Endowment Fund, housed and administered by the US Treasury, provides funds to TCU land-grant institutions through dissemination of the annual interest yield. Although Congress has made regular contributions to the corpus of the endowment, the latest interest yield shared by the 34 eligible 1994 institutions amounts to approximately \$5 million.

These funds assist in strengthening academic programs, including agriculture curricula development, faculty development, instructional delivery, and experiential learning. Funds are also used to enhance student recruitment and retention in the agricultural sciences, as well as to address the ongoing need for improved facilities at the 1994 land-grant institutions. From the annual interest yield an administrative fee of four percent is deducted by the Department of Agriculture, and the remainder is distributed to the 1994 land-grant institutions. Because only the annual interest yield is dispensed, only the interest – not the appropriated payment amount – is scored as budget outlay; yet the additional interest available to the TCU land-grant institutions (1994) will yield get dividends in community-based programs.

Rural Development: Essential Community Facilities at Tribal Colleges and Universities Grant Program

- Provide \$8 million for the TCU Essential Community Facilities Grant Program.

The USDA-Rural Development program provides grants for Essential Community Facilities at TCUs and funds the ever growing need for construction, improvement, and maintenance of TCU facilities, such as advanced science laboratories, computer labs, student/faculty housing, day care centers, and community service facilities. Although the situation has improved at many TCUs over the past several years, some institutions still operate partially in temporary and inadequate buildings. Few TCUs have dormitories, even fewer have student health centers, and only a handful of TCUs have full research laboratories.

The 1994 land-grant institutions need a commitment of \$8 million each year for the next five fiscal years to support construction, improvement, and maintenance of their facilities.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

Transportation, Housing and Urban Development Appropriations Bill

HUD-University Partnership Program for Tribal Colleges and Universities

- *Provide \$5.5 million to reinstate the HUD-University Partnership Program for Tribal Colleges and Universities (TCUs).*

Executive Order 13592, “Improving American Indian and Alaska Native Educational Opportunities and Strengthening Tribal Colleges and Universities,” holds federal agencies accountable for developing plans to integrate TCUs into their programs. TCUs work with tribes and communities to address all aspects of reservation life, including the continuum of education, housing, economic development, health promotion, law enforcement training, and crime prevention. Likewise, federal agencies need to work with TCUs. To achieve results, Congress needs to hold the Administration accountable for strengthening the

TCUs, including their physical plants, and for routinely including TCUs as full partners in all existing and potential federal higher education programs. The HUD-TCU competitive grants program, administered by the Office of University Partnerships, is an excellent place to start. This competitive grants program has enabled TCUs to expand their roles and efficacy in addressing development and revitalization needs within their respective communities.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Labor, HHS, Education Appropriations Bill Head Start

- ***Provide \$10.81 billion in total funding for Head Start, which includes Indian Head Start.***

Head Start has played and continues to play an instrumental role in Native education. Head Start funds provide early education to over 24,000 Native children. This vital program combines education, health, and family services to model traditional Native education, which accounts for its success rate. However, as inflation and fiscal constraints increase, current funding dollars provide less for Native populations. There is a return in benefit to society of at least \$7 for every single dollar invested in Head Start. Therefore, Congress should increase funds to Head Start and Early Head Start to ensure Indian Head Start can reach more tribal communities and help more Native people by triggering the Indian special expansion funding provisions (after a full Cost of Living Allowance has been paid to all Head Start programs).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Labor, HHS, Education Appropriations Bill Head Start, Tribal Colleges and Universities Head Start Partnership Program

- ***Provide \$8 million (from the \$10.81 billion proposed) for Tribal Colleges and Universities Head Start Partnership Program.***

The TCU-Head Start Partnership program, as reauthorized in PL 110-134, supported the TCUs in providing high-quality, culturally appropriate training for teachers and workers in Indian Head Start programs. With the reauthorization of the Head Start program in the mid-1990s, Congress mandated that by 2013, 50 percent of Head Start teachers nationwide must have at least a baccalaureate degree in Early Childhood Education and all teacher assistants must have a child development associate credential or be enrolled in an associate's degree program. Today, 73 percent of Head Start teachers nationwide hold the required bachelor's degree; but only 39 percent of Head Start teachers in Indian Country meet the requirement, and only 38 percent of workers meet the associate-level requirements. This disparity in preparation and teaching demands our attention: AI/AN children deserve – and desperately need – qualified teachers. TCUs are ideal catalysts for filling this inexcusable gap. From 2000 to 2007, the U.S. Department of Health and Human Services provided modest funding for the TCU-Head Start Program, which helped TCUs build capacity in early childhood education by providing scholarships and stipends for Indian Head Start teachers and teacher's aides to enroll in TCU early childhood programs. Before the program ended in 2007 (ironically, the same year that Congress specifically authorized the program in the Head Start Act), TCUs had trained more than 400 Head Start workers and teachers, many of whom have since left for higher paying jobs in elementary schools. Today, Tribal Colleges are providing culturally based early childhood education free of charge to local Head Start workers. With restoration of this modestly funded program, similar programs could be available to the teachers and aides throughout Indian Country.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Labor, HHS, Education Appropriations Bill

Native Languages Preservation (Esther Martinez Program Grants)

- *Provide \$14 million for Native language preservation with \$5 million designated to fund the Esther Martinez Language programs.*

Native language grant programs are essential to revitalizing Native languages and cultures, many of which are at risk of disappearing in the next decade. With adequate funding, Esther Martinez Program Grants support and strengthen Native American language immersion programs. In addition to protecting Native languages, these immersion programs have been shown to promote higher academic success for participating students in comparison to their Native peers who do not participate. The federal budget should include \$14 million as part of the appropriation to the Administration for Native Americans for Native language preservation activities. The appropriation should also include \$5 million designated to support the Esther Martinez Language Programs' Native language immersion initiatives, as they have demonstrated success in strengthening Native language revitalization.

NATIONAL SCIENCE FOUNDATION (NSF)

Commerce, Justice, and Science Appropriations Bill

Education and Human Resources (EHR)

- *Provide at least \$15 million to the Tribal Colleges and Universities Program.*

In FY 2009, NSF awarded \$4.2 billion in science and engineering (SE) funding to the nation's institutions of higher education, and TCUs only received \$10.5 million, or one-quarter of one percent of this funding. Among other minority serving institutions, NSF awarded \$144.2 million in SE funding to 174 historically black colleges and universities and Hispanic serving institutions, averaging \$828,545 per institution, while 29 TCUs received an average of only \$362,000 per institution. This disproportionate distribution must be addressed in FY 2020.
