

2020 Census Self-Response Rates - NCAI Region Profile

Northwest Region – 10/28/2020

2020 Census self-response rates are the percent of all households that have completed the 2020 Census form as of the date indicated. The 2020 Census self-response rates in this profile are downloaded from the U.S. Census Bureau for the tribal lands or geographies located in this National Congress of American Indians (NCAI) Region and are current as of the date of this report. While the goal is to achieve a 100 percent count, these profiles illustrate where the overall NCAI region and the tribal lands within the NCAI region are in terms of 2020 Census self-response rates compared to the 2010 Census final self-response rate and the current US national self-response date.

Enumeration ended on October 15, 2020. The U.S. Census Bureau released a self-response rate dataset for October 28, 2020. The dataset included updated tabulations from the final days of enumeration and mail in questionnaires postmarked on or before October 15, 2020.

Figure 1 shows 2020 Census self-response rates for tribal lands in the NCAI Northwest Region compared to the 2020 Census U.S. national response rate since July 1, 2020.

While the 2020 Census self-response rates were increasing for the NCAI Northwest Region, the latest result (58.5 percent) is a 0.3 percent increase from the previous update on October 14, 2020 and is over 30 percent lower than the 2020 national response rate. From July 1, 2020 to the most recent October 28, 2020 dataset, the NCAI Northwest Region saw a 17.2 percent increase in enumeration self-response, from 49.9 percent to 58.5 percent.

Table 1 displays the 2020 Census self-response rates for each of the tribal lands reported by the U.S. Census Bureau in the NCAI Northwest Region as of October 28, 2020 from lowest to the highest response rates.
